

## Do you want to know more?

We will be arranging ongoing information meetings with examples of the fyrfack bins. You can find the locations and dates of these meetings on [ssam.se](http://ssam.se) and on our Facebook page.

## Do you have questions or comments about recycling?

At [ssam.se](http://ssam.se), there is both information and in-depth material. You can also choose to e-mail us at:

[info@ssam.se](mailto:info@ssam.se)  
0470-59 95 00

At the top right corner of our webpage, you can translate the information into your desired language

# CHOOSE FYRFACK!

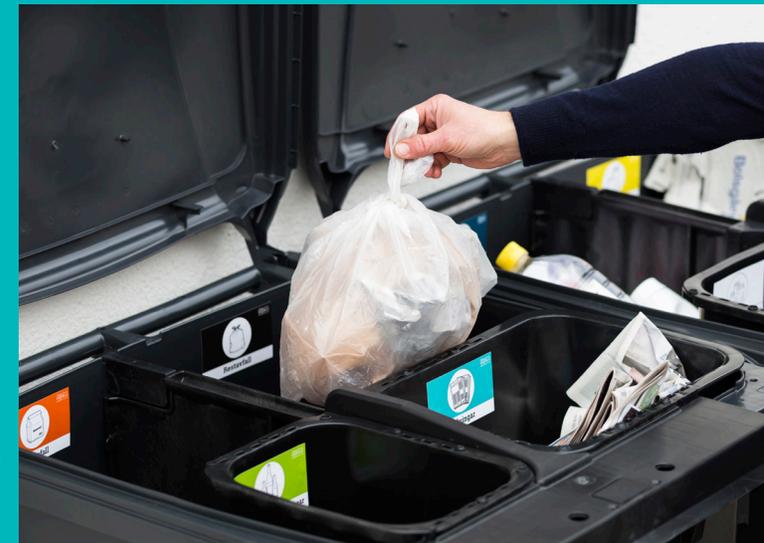

In a short time, fyrfack (four-compartment bin) sorting, the new system for waste management will be introduced. The fyrfack system will enable us to offer better service and make your everyday life more flexible. We will be collecting your food waste and your newspapers, packaging material and electronic waste (e.g. light sources and batteries). You won't need to drive to the recycling station. But first and foremost, this will enable us all to work together for a more sustainable environment.

Sorting trash, however, is not only an important way of protecting people and the environment and conserving resources. As a matter of fact, every resident has a legally-mandated obligation to sort his or her household's wastepaper for recycling, packaging materials, dangerous waste, medicines and bulky refuse. The new system makes it much easier to sort correctly.

SÖDRA SMÅLANDS AVFALL & MILJÖ

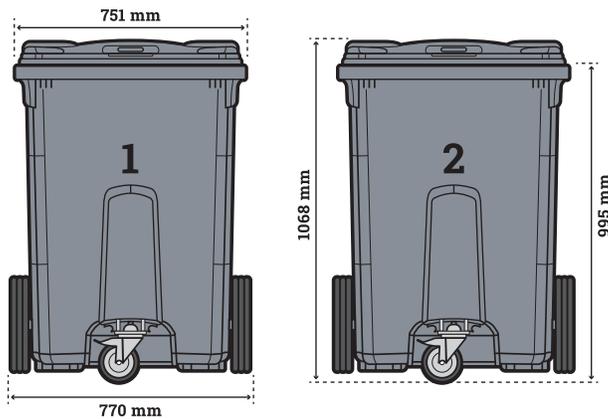

# The fyrfack bins

- Each bin holds 370 litres and is about 77 cm wide, 107 cm high and 85 cm deep.
- You have the option of ordering an additional bin for remaining waste if you have large volumes of this waste, for example, because of using nappies.
- You can apply to share a service contract with an adjacent neighbour. You each pay your own basic fee, but you split the collection fee.

Please note that currently existing shared service contracts will no longer apply after the introduction of fyrfack.

You can find the application form for sharing a service contract at [ssam.se/blanketter](http://ssam.se/blanketter). You can also contact our customer service function.

## How to put out your bins

- Put out your bins on a level and stable surface without high edges.
- The area recommended for bins that are meant to stand next to each other is 2 x 1 metre. For bins for garden waste, add one metre.
- The recommended height of any structure for the bins is 115 centimetres
- The bins should be placed not more than 5 metres from your property line, no later than 6 a.m. on the date of collection. You can purchase additional distance between the bin and your property line. Read more on [ssam.se/placeringavkarl](http://ssam.se/placeringavkarl) and [ssam.se/framkomlighet](http://ssam.se/framkomlighet).
- Remember to shovel snow and sand in the winter.

# When are the bins coming?

## Private homes

- Lessebo municipality: the system is introduced
- Tingsryd municipality: the system is introduced
- Växjö municipality: during 2020
- Markaryd municipality: starting in the autumn of 2020
- Älmhult municipality: starting in the spring of 2020

## Holiday homes

- Lessebo municipality: starting in the spring 2020
- Tingsryd municipality: starting in the spring 2020
- Växjö municipality: starting in the spring of 2021
- Markaryd municipality: starting in the spring of 2021
- Älmhult municipality: starting in the spring of 2021

# How to sort

## Bin 1

Food waste

Remaining waste

Coloured glass bottles and jars

Newspapers

## Bin 2

Plastic packaging

Paper packaging

Transparent glass bottles and jars

Metal containers

- A box for electronic waste (light sources and batteries) can be hung on Bin 2. This should be done only when the box needs to be emptied.
- Food waste must be sorted into a separate bag.
- You place remaining waste in a securely tied plastic bag, as usual.
- A sorting guide comes with your new four-compartment containers.

# The choice

If you do not choose fyrfack, there is a service contract called unsorted (osorterad). There are two sizes to choose from – 190 litres and 370 litres. All other sizes will be discontinued. You may only use these bins to dispose of remaining waste and food waste. In that case, you will need to continue to take responsibility on your own for the sorting and transporting of your packages, newspapers, batteries and light sources to the recycling centres and recycling stations.

Information about the collection intervals that apply to this service contract will be sent to your home prior to the introduction of fyrfack.

*Please note that if you do not communicate your choice, you will automatically be assigned a fyrfack service contract.*

*We will send you instructions for the choice when it is time for your area.*

## New prices and rates

With the advent of fyrfack, there will be updated prices and rates for all service contracts. These will begin to apply in conjunction with the introduction of the fyrfack system in your area. You can find the rates for your municipality on the annexed sheet, but regardless of the service contract you choose, additional information will be sent to your home prior to the introduction of fyrfack.
